United International University QUEST FOR EXCELLENCE	**Final Examination** **Trimester:** Spring - 2026 **Course Title:** English II (**Code:** ENG 1013)
Time: 2 Hours	**Full Marks:** 40
Reading & Writing: 30	**Listening & Speaking:** 10

Note:

i. The right-hand margin shows marks carried by individual questions.

ii. Any examinee found adopting unfair means will be expelled from the course, semester, or program as per the UIU disciplinary rules.

Part: A (Reading) **Marks: 09 [CO 2]**

Read the passage below and answer the following questions.

Sleep is one of the most important factors in maintaining good health and well-being. Although many people view sleep as simply a time for rest, it is actually a complex biological process that plays a vital role in physical, mental, and emotional health. For teenagers, who are still growing and developing, getting enough sleep is especially important. Health experts recommend that adolescents get between eight and ten hours of sleep each night to support their overall development.

During sleep, the body carries out many essential functions. Muscles repair themselves, tissues grow, and the immune system strengthens its ability to fight infections. At the same time, the brain remains active. It processes information gathered throughout the day, organizes memories, and prepares the mind for learning new information. This is why students who get adequate sleep often perform better in school than those who do not.

Research has shown that sleep has a direct impact on concentration, creativity, and decision- making skills. A well-rested student is more likely to stay focused during lessons, complete assignments efficiently, and participate actively in classroom discussions. On the other hand, sleep deprivation can reduce attention span and make it difficult to understand or remember information. As a result, students who regularly lack sleep may struggle academically despite their best efforts.

The effects of insufficient sleep are not limited to academic performance. Lack of sleep can also affect emotional well-being. People who do not get enough sleep may become more irritable, stressed, or anxious. Over time, chronic sleep deprivation can contribute to serious health problems, including obesity, high blood pressure, heart disease, and depression. Furthermore, tired individuals are more likely to make mistakes or have accidents because their reaction times are slower.

Modern lifestyles often make it difficult for teenagers to get enough sleep. Many students stay up late studying, using social media, playing video games, or watching online content. The blue light emitted by electronic devices can interfere with the body's natural sleep cycle, making it harder to fall asleep. In addition, irregular sleep schedules can disrupt the body's internal clock Page 1 and reduce sleep quality.

Fortunately, there are several ways to improve sleep habits. Maintaining a consistent bedtime, limiting screen use before bed, avoiding caffeine late in the day, and creating a quiet and comfortable sleeping environment can all contribute to better sleep. Regular physical activity can also help people fall asleep more easily and enjoy deeper, more restorative sleep.

In conclusion, sleep is not a luxury but a necessity. It supports learning, physical growth, emotional stability, and overall health. By making sleep a priority, students can improve their academic performance, protect their health, and enjoy a higher quality of life.

1A. Choose and write the best option for the following questions. **[3×0.5=1.5]**

i) How many hours of sleep do health experts recommend for adolescents?

a) 5-7 hours
b) 6-8 hours
c) 8-10 hours
d) 10-12 hours

ii) What does the brain do during sleep?

a) Stops functioning completely
b) Processes information and organizes memories
c) Only controls breathing
d) Uses more energy than during the day

iii) Which of the following can interfere with the body's natural sleep cycle?

a) Reading books
b) Drinking water
c) Blue light from electronic devices
d) Taking short walks

1B. Write TRUE if the statement agrees with the passage, FALSE if the statement contradicts the passage, or NOT GIVEN if there is no information on this. **[3×0.5=1.5]**

i. Students who sleep less always fail their exams.
ii. Regular physical activity can improve sleep quality.
iii. The passage states that girls need more sleep than boys.

1C. Make grammatically correct and meaningful sentences with the following words. **[4×0.5=2]**

i. deficiency ii. diminish iii. adversity iv. routine

1D. Write short answers to the following questions in your own words. **[1 + 1 + 2 = 4]**

i. Why do students who get enough sleep often perform better in school?
ii. Name two ways teenagers can improve their sleep habits.
iii. In your opinion, why do many teenagers fail to get enough sleep, and what can schools and families do to help them develop healthier sleep habits?

Part: B (Writing) **Marks: 21 [CO 1]**

2A. Write **A** beside the sentence that is an **announcement** rather than a thesis statement. Write **TN** beside the statement that is **too narrow** to be developed in an essay. Write **TB** beside the statement that is **too broad** to be developed in an essay. Write **OK** beside the statement that makes **a clear point**. **[4x0.5=2]**

1. a. Technology is everywhere in today's world.
b. The rapid rise of smartphone usage has significantly changed how people communicate and access information.
